Front v6

Thank you for purchasing my template, Front!

General Information

- 100% responsive design
- Based upon Twitter Bootstrap v3.2.0
- 9 pages provided

License

- License does not expire.
- Can be used on 1 site, 1 server
- Source-code or binary products cannot be resold or distributed
- Non-commercial use only
- Can modify source-code but cannot distribute modifications (derivative works)
- Attribution to software creator must be made as specified:
  - Must retain "Design by Jerred Shepherd", as it is, unless attribution removal is purchased.
- Parts of the software are provided under separate licenses, as follows
  - jQuery v2.0.3 is under the MIT license
  - Bootstrap v3.2.0 is under the MIT license
  - Font Awesome v4.2.0 is under SIL OFL 1.
  - Font Awesome CSS v4.2.0 is under the MIT license
  - PHP-Minecraft-Query is under the Creative Commons NCSA license

More licensing information provided in the LICENSE.txt

Contact

If you have a suggestion, or need help (to a reasonable extent), feel free to add me on Skype, my username is RiotShielderr. You may also email me at Me@ShepherdJerred.com. Support is NOT provided for your own customizations, it is only provided to fix shortcomings in the templates, and to help explain how to customize certain areas of the template

Attribution

Attribution must stay with the template. Altering it without purchasing it will result in the revocation of your licenses, meaning you won't receive any future updates. If you'd like to remove the attribution, you can purchase it at ShepherdJerred.com/whmcs

Updates

All further updates will be sent to you via my site. No updates are guaranteed.

Installation

Simply unzip/upload these files onto your webserver. No further installation is required.

Requirements

Your webserver requires php for the play page to work.

Customization

Images

/img/bg – Home page pictures. Every page load selects a different image at random.

/img/help – Play page help.

/img/marketing – The 3 images shown below the main image on the home page

/img/servers – The thumbnails shown on the play page for servers

Play Page

Change the respective properties to ping your server. Your server MUST have query-enabled: true in the server.properties. This port has to be unused.

```
enable-query=true
allow-flight=false
announce-player-achievements=true
server-port=25565
query.port=25566
```
